I believe that xm radio has the right to broadcast anything they want. I personally am not a listener, but my husband is, as he travels across county every week , driving a truck, and having access to that knowledge is indispenseble.... we pay for this service. If the other stations want us to listen, then they need to put up towers where we can hear them..... Isn't this the country of freedom... to do what we want... and to listen to whatever we want.. i support the satilite radio.
